

Lana Bracken

Project: Database Design and Implementation

Task 2 ii) The insert script filled in with data did not pop up. I executed a few manual updates and a script generated, I was kind of expecting the same thing, but didn't. I know it is too tedious to physically write all the insert stmts. I have provided a zip file of my csv files also.

Customer

```
INSERT INTO `finalproject`.`customer` (`CustomerID`,`Name`) VALUES(?,?)
```
